The Sixth International Professional and Scientific Conference "Methods and Programs of working with the Gifted"

29 September – 1 October 2023, Novi Sad

Venue: University of Novi Sad – Rectorate, 1 Zorana Đinđića Street.

The Aim of the Conference:

After five conferences, where we covered topics related to defining giftedness, recognizing the gifted, the role and importance of a stimulating environment for the development of the gifted, various social systems that are important for creating an environment in which the gifted develop, and the development of giftedness throughout the entire life cycle, **this year we want to cover concrete methods, programs and procedures that encourage the development of giftedness and creativity in different areas and for the needs of different generations.**

Considering that during the previous years, we have already gathered a significant number of experts who recognize and work with the gifted, **we want to create a space for the exchange of knowledge about techniques, methods, procedures and programs that arise, develop and show results that are visible in the lives of gifted children, young people and adults and help them discover, develop and use their talents.** We expect that through exchanges of knowledge and discussions on these topics, we will become more prepared for their application and thus contribute to the visibility of good practices for working with the gifted.

As in previous conferences, we want to encourage discussions, presentations of examples of good practice, and workshops for conference participants. We want to make the conference a place to create new opportunities for cooperation and learning from international experiences and the multidisciplinary approach of experts, practitioners, educators, employers, policy makers and all stakeholders.

We sincerely hope you will recognize your interest in joining us!
